Dynamic React Native developer with hands-on experience in cross-platform mobile app development and API integration. Skilled in Redux and Firebase, I excel in creating responsive applications while effectively collaborating with teams to deliver exceptional user experiences. Passionate about leveraging technology to drive impactful solutions.

EXPERIENCE

React Native Developer, *TechnoAdviser Technologies Pvt. Ltd*

12/2025 – Present
Ahmedabad

- Created reusable components and followed clean, scalable architecture
- Integrated third-party libraries and native modules as per project requirements
- Integrated RESTful APIs using Axios with proper error and loading state handling
- State management with Redux & Redux Toolkit
- Converted Figma UI/UX designs into pixel-perfect, responsive mobile screens
- Optimized app performance using FlatList, memoization, and efficient rendering

React Native Developer, *Stellermind.Ai*

04/2025 – 11/2025
Ahmedabad, India

- Cross-platform mobile app development (React Native)
- API integration (REST, Axios)
- State management with Redux & Redux Toolkit
- Third-party libraries & native module integration
- UI/UX implementation from Figma designs

React Native Developer, *Angel Infotech*

10/2023 – 12/2024
Rajkot, India

- Redux
- Firebase authentication
- Facebook and Google authentication
- Chat application
- Junno express application

EDUCATION

M.Sc: IT, *H.N.S college*

04/2024

B.C.A, *M.V.M college*

03/2020

SKILLS

React Native • JavaScript / TypeScript • Firebase • Tailwind CSS • REST API Integration • Redux / Redux Toolkit • Responsive UI Development • Push Notifications • Git & GitHub • Android & iOS App Deployment & Publishing • Google Play Console • App Store Connect

LANGUAGES

English • Hindi • Gujarati

PROJECT

Neevethnic

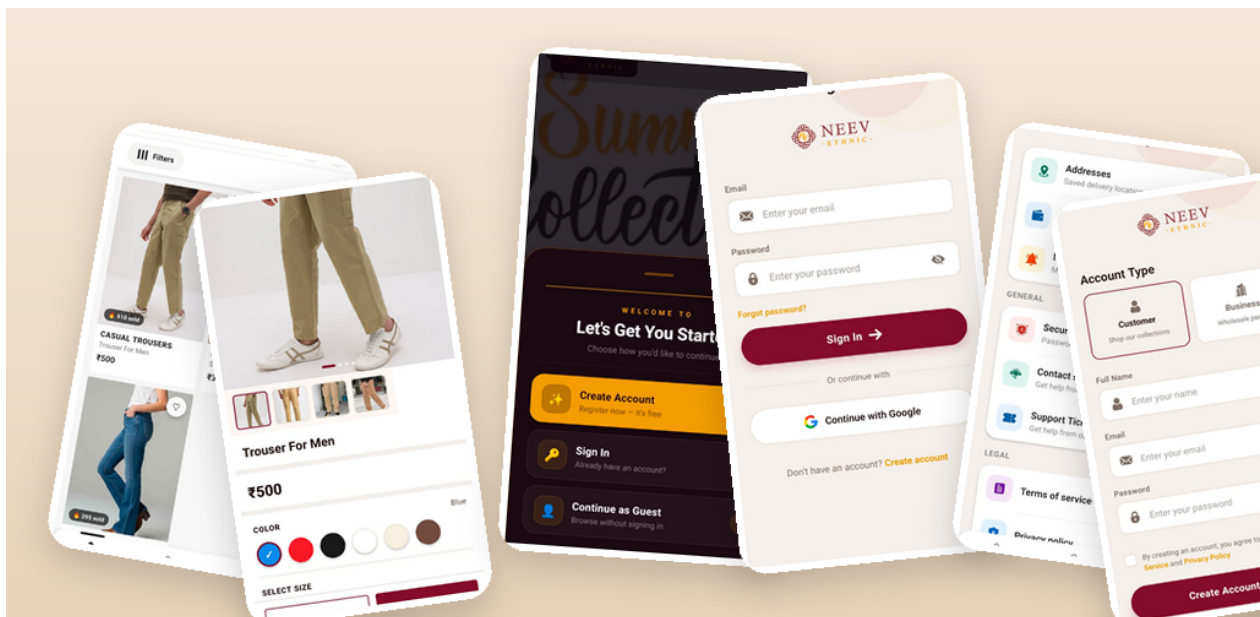

Developed a role-based ethnic fashion e-commerce mobile application using React Native with three dedicated user roles — Customer, Business, and Admin — each with separate login flows and role-specific UI designs: Customers browse and shop for products, Business users (shop/store owners) manage their own product listings and inventory, and Admin oversees and manages the overall platform.

- Built a role-based e-commerce mobile application with **three separate user roles: Customer, Business, and Admin**, each with dedicated login flows and role-specific UI designs.
- Implemented **role-based authentication and access control** with separate features and permissions for Customer, Business, and Admin users.
- Developed **Customer module** for product browsing, cart, checkout, order tracking, order history, profile management, and settings.
- Developed **Business module** for shop/store owners to manage their product catalog, inventory, orders, coupons, and store profile.
- Developed **Admin module** for managing products, orders, users, and Business (shop/store owner) accounts across the platform.
- Managed application state and user data using **Redux Toolkit**.
- Implemented **form validation, loading states, API error handling, and secure authentication flows**.

Sycf App

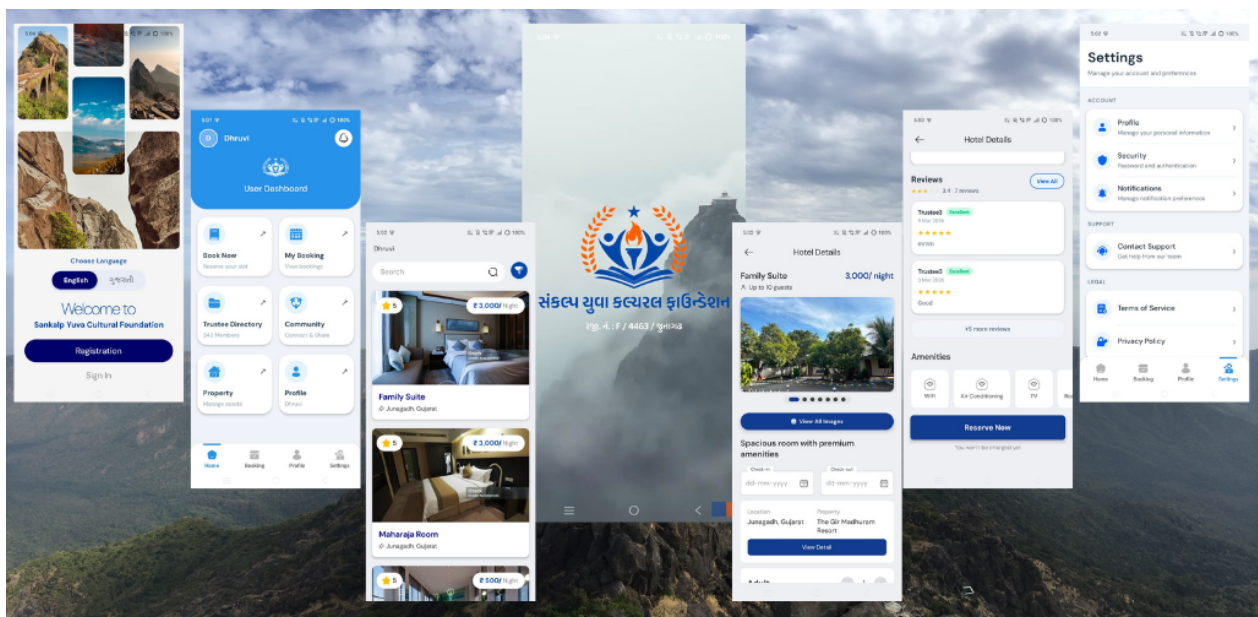

Developed a role-based hotel booking and management mobile application with **separate access and features for Admin, Trustee, and User**, covering end-to-end booking, property management, and donation workflows.

- Implemented role-based authentication for User, Admin, and Trustee with secure login flows
- **User module:** hotel booking, booking details & cancellation, profile, change password, settings
- **Admin module:** manage properties, rooms, bookings, activities, and trustee accounts
- **Trustee module:** manage bookings, generate & share coupons, donations, EMI, and directory
- Integrated REST APIs using Axios and managed data with Redux Toolkit
- Implemented form validation, loaders, and API error handling
- Developed responsive UI from Figma designs using reusable components.

Supply App

Developed a supplier management mobile application that enables suppliers to efficiently manage their products and services. The app includes full CRUD functionality with seamless API integration and a user-friendly interface.

- Integrated RESTful APIs to perform CRUD operations for supplier data.
- Implemented Redux Toolkit for state management and async thanks for handling API requests.
- Added form validation, loading states, and error handling for a smooth user experience.
- Optimized app performance and tested on both Android and iOS devices.

TechStack: React Native, Redux Toolkit, Axios, TypeScript, REST API, React Navigation, Firebase Notification, Google Location

TheFabApp

Developed three separate apps — Driver, Customer, and Employee — covering the complete booking and service flow.

- Designed and implemented complete UI/UX for all three apps.
- Integrated Redux for state management and API connections.
- Created complete booking flow for both Customer and Employee apps, integrated with APIs.
- Integrated push notifications across Driver, Employee, and Customer apps for job start-to-end updates.

Tech Stack: React Native, Redux, Axios, Google Maps API, Firebase Push Notifications.
